

Expense Management

eProcurement doesn't have to be a huge project. Rather, take the benefits without the huge investment:

- ◆ Reduce processing costs
- ◆ Streamline AP Operations
- ◆ Capture detailed transaction info on purchases
- ◆ Control expenses that start at point of purchase
- ◆ No software investment
- ◆ Generate quick payback

Where else can you generate revenue from paying bills?

Why Purchasing Card?

The proof is evident...

- ◆ Up to 90% savings on transactional costs
- ◆ Generate Interchange Fee revenues of 2%
- ◆ \$5.85 savings per typical non-PO transaction

Purchasing Card

Do you have a program that takes advantage of e-Commerce that also generates **revenue**? Trying to get more control over spending?

Implement a Purchasing Card Program!

Don't know where to begin? **Vitex** takes the guesswork out of the equation and puts the "know-how" to quickly implement a program that starts **making** money for your Company, while **saving** on expenses.

Vitex has the necessary "know-how" and methodology to get your P-Card program up and running quickly -- first with a Pilot, followed by a controlled rollout. **Result:** a *restricted* P-Card program used only by **authorized** buyers for the procurement of specified goods and services for your Company's benefit.

Why not make money AND save money?

Our methodology allows offsite analysis, robust reporting, **without disruption** to your operations – all with *no upfront* consulting fees. Rather, we take on the risk by sharing in a percentage of the **documented** savings from the first year of **realized** benefit to your Company.
